

## 5712-54X CPLD Updater Instruction

1. Just one command (either in ONIE rescue mode or ONIE update mode) is needed as below:

```
ONIE:/ # update_url
```

```
tftp://192.168.3.99/AS5712_v666_20150709.jbc.updater
```

※Note that the 192.168.3.99 is the IP address of the TFTP server. Please make sure 5712-54X eth0 can access TFTP Server.

2. Confirm all three CPLD version number fields are 6:

```
ONIE:/ # for i in 0x60 0x61 0x62; do i2cget -y 0 ${i} 0x1; done
```

```
0x06
```

```
0x06
```

```
0x06
```

Done!

- ※ For 5712-54X ONIE version, the current stable production version is 2014.08.00.05.
- ※ No matter which ONIE version on 5712-54X, this “AS5712\_v666\_20150709.jbc.updater” can always be used to upgrade CPLD code to version 6.
- ※ After update, the ONIE version on 5712-54X remains unchanged. Please use command above to confirm the CPLD code is upgraded.
